

TCC Hotline

New Mexico Institute of Mining & Technology
Tech Computer Center

April 13, 2007

Email notification of Outages

Notification of a scheduled outage of TCC servers is available through the message of the day (motd) that is displayed whenever you login to a TCC MS-XP client, a TCC Linux client, a TCC Macintosh client, a TCC login server, or the TCC Web-mail interface. If you wish to receive an email of a planned outage, you can sign up for such a service via the TCC Lyris server. Simply connect to the following web page:

http://lyris.nmt.edu/read/all_forums/subscribe?name=tcc_motd

(Note that you must provide a fully qualified email address: username@nmt.edu)

MS Office 2007

The TCC plans to install MS Office version 2007 for the Fall 2007 semester. If this poses a problem for you, please contact the TCC. A description of the differences between MS Office version 2003 and version 2007 may be found at:

<http://infohost.nmt.edu/tcc/>

Software for the Fall Semester

The following new software will be installed or updated for the fall 2007 semester. If you need any additional software to teach your classes, please inform us. Requests for new software that are received by July 20, 2007, will be installed at no charge. Requests received after July 20, 2007, are not guaranteed to be done and will be billed to the requestor.

Adobe CS3
Ansys 11

Maple 11
Matlab 2007a

Minitab 15

For a list of existing software, please check the web page:
<http://www.nmt.edu/tcc/packages.html>

Fedora 7

Over the summer, the TCC will be testing Fedora 7 as a possible upgrade for Fedora Core 5 on the TCC Linux clients for the Fall 2007 semester. If this poses a problem for you, please contact the TCC.
