

TCC Hotline

New Mexico Institute of Mining & Technology
Tech Computer Center

January 07, 2008

SSH disabled on DBHOST

Effective January 07, remote *ssh* login to dbhost.nmt.edu will be disabled as part of our ongoing security effort. Users are encouraged to use mysql, and oracle clients to interact with their databases on dbhost.

SSH disabled on INFOHOST

Effective January 07, remote *ssh* login to infohost.nmt.edu will be disabled as part of our ongoing security effort. User web pages can be edited from the ~/public_html/ directory on any TCC login server.

FTP disabled on INFOHOST

Effective January 07, *ftp* login will be disabled to infohost.nmt.edu as part of our ongoing security effort. Please use the secure *sftp* command and connect to the TCC login servers at linux.nmt.edu instead of to infohost.nmt.edu.

Software for Spring 2008

We will be installing the following upgraded software for the Spring semester:

1. Comsol 3.4
2. Maple 11.02
3. Matlab 2007b
4. Nero 8
5. X-Win32 V9

New TCC webserver

The TCC is preparing a replacement webserver based on a newer operating system. It is currently available for testing at infohost5.nmt.edu. Users are encouraged to test how their current web pages display on the new server by connecting to <http://infohost5.nmt.edu/~username>.
