Speare 116 Upgrade
The 20 computers in Speare 116 were upgraded with 24 inch LCD monitors.

Speare 5 Upgrade
The 14 computers in Speare 5 were upgraded with 24 inch LCD monitors.

Software Upgrades
The following software packages were upgraded for the Spring semester:
Comsol-4.2a
Cygwin-X
Flow 3d- 10.0
Intelicad-2011
Mathcad-15.0
Matlab-2011b
R-2.14
Storm-4.0

Workman 101 Projector
A new Infocus 5124 projector was installed in Workman 101. This projector has improved 4,000 lumens, 2,000:1 contrast ratio, and widescreen support.

Moodle
Faculty are reminded that Moodle, which is a Course Management Software (CMS), is available at moodle.nmt.edu. If you want to use Moodle, please send an email to cms_master@nmt.edu specifying the class. Be sure to include the course name, title, section(s), and CRN(s). Please specify if you want more than one CRN combined into a single class (i.e. colisted courses). To schedule one-on-one training in the use of Moodle, please send email to cms_master@nmt.edu.

Training Class on Instructor Cluster
The TCC provides a one-on-one training session for anyone that wants to learn how to utilize the Instructor Cluster available in all of our Computer Classrooms. You learn how to connect a laptop to the projector, play DVDs with the projector, use the rack-mounted PC to access your files and the TCC printers, access the TCC software, and use the ELMO document camera. Please call x-5735 or email dylan@nmt.edu to schedule a session.

Phishing and Passwords
In recent weeks, hackers have sent out email claiming to represent NMT departments or US Banks and asked users to provide their passwords or have their accounts terminated. NEVER respond to such phishing attempts. No department at NMT would ever request you to email them your password. (In the field of computer security, phishing is the criminal process of attempting to
acquire sensitive information such as usernames and passwords, by masquerading as a trustworthy entity in an electronic communication.)

**Password Security**

Recently NMT was subjected to a spam attack because users had used a password at a different Internet Service Provider (ISP) that was compromised. Once the spammers had the password from the other ISP they could use the same password at NMT to login and send spam email to other sites. Please do not use the same password at multiple ISPs.
