

Graduate Studies in Chemistry

NMT offers M.S. and Ph.D. programs with opportunities to work with outstanding faculty having collaborations nationally and worldwide.

Research specializations

- Biochemistry
 - Cancer detection
- Environmental Chemistry
 - Aquatic chemistry
 - Atmospheric chemistry
 - Climate Modeling
 - Geoengineering
- Organic synthesis
 - Florescent activation chemistry
 - Green chemistry
 - Medicinal chemistry
 - Natural product synthesis
- Computational Chemistry

The faculty to graduate student ratio is low. Students in our department are treated as individuals. Those that like to work more independently are allowed to do so and those that prefer greater faculty input work more closely with their advisor.

New Mexico Tech is located 80 miles south of Albuquerque nestled in the Rio Grande Valley. Close to a diversity of environments. An excellent place for those who love outdoor activities. Socorro has a low cost of living and easy-going atmosphere.
