New Mexico Institute of Mining and Technology
Copyright for Theses and Dissertations

NMT's Policy
Your Electronic Thesis/Dissertation (ETD) will be made available immediately after graduation worldwide on the Internet via NMT's Library, unless you choose to delay release for publishing or patent reasons.

Instructions
Please complete all fields and make selections (e.g., MS or PhD) using check boxes. If you are using Acrobat Pro, you will be able to upload images of physical signatures and submit the PDF form via email. Otherwise, you will need to print the form, sign the printout, and submit the paper version to the Center for Graduate Studies in Fitch Hall.

How to Choose an Availability Option

Why would I choose “Journal Hold”?
If you are (or will be) submitting material to a journal that restricts Internet access to material prior to publication, a “Journal Hold” is the option you need to select. This gives you time to get published. Your ETD will be released one year after graduation to the Internet. This hold may be extended one additional year if an email is received before the initial hold ends, to give you time to finish publishing your material. Every request received will be replied to within five business days.

What is a “Patent Hold,” and when would I choose it?
If you have patent and/or proprietary reasons for having information in your ETD withheld from the public domain, NMT will hold your document to allow time for your patent submission or proprietary protection. Your ETD will be released one year after graduation to the Internet. This hold may be extended one additional year if an email is received before the initial hold ends, to give you time to patent or protect your material. Every request received will be replied to within five business days.

What if I have more questions about availability options?
If you still have questions or concerns about availability options, please call (575) 835-5513, email us at graduate@nmt.edu, or drop by our office at Room 203, Fitch Hall.
