

Wild Well Control School April 4-6, 2008 MSEC 367

Wild Well Control has again offered to provide the necessary training and skills for our students to be safe and knowledgeable on the rig. In the Spring of 2006, Wild Well Control trained 17 students in the first time we offered this school. The 2 ½ day industry school is rigorous and hands on, with the students receiving I.A.D.C. certification if they successfully pass the course. The course is extremely popular with the students, and thus we hope to schedule this school again next year.

We would like to thank the following sponsors for their support:

Josh Kamas (PETR '05), Marathon Oil

The entire Board of the National AADE, including: Jeff Day, Duane Halverson & Bob Freeman

Weatherford®

April 4th – 6th , 2008
