--As part of the ongoing Tree Replacement Program, Facilities Management arranged for a study to be conducted on the center of campus by Mr. James Freeman, a professional arborist and retired New Mexico Urban Forester. Of the 205 older trees evaluated, Mr. Freeman has designated 25 for removal. This designation was based on the extent of internal or basal decay, often as a result of construction injury, previous topping, or other damage. Five of these trees have been removed, and the stumps will be ground as time permits. The other trees will be scheduled for removal over the coming year.

The trees to be removed are primarily elm and mulberry. They will be replaced by many different varieties which will contribute to the diversity of the trees on the New Mexico Tech campus.
