

## **Minutes for STC Meeting Monday, January 29th, 2007**

---

The old business brought up this meeting started with discussing the possibility of the Philadelphia STC conference. We also passed out the forms needed to become full student members of the STC chapter. Also discussed was the possibility of a joint function with NMSU.

The club fair was held earlier in the day and was quite successful. We managed to fill up six full sheets of endorsements! Good job, guys!

The new business started with an idea of STC members going to the high schools that we graduated from to promote the TC program. We would each be expected to give a small information session and would be reimbursed through travel request forms that can be obtained at Admissions.

February 19th is Research at Tech day. High school students will be able to listen to senior theses from the Technical Communications program.

We decided at the meeting that after club fair we need a TC banner. The idea of a design contest was proposed. It was also suggested that the TC 151 class be made aware of the opportunity to participate in the design contest. We could also advertise the contest on Scope. The TC logo is available, along with the national logo, on the website for those wishing to enter the contest.

The possibilities of a PowerPoint workshop and other workshops were discussed further. If you have any ideas of a workshop you would like to hold, please let us know!
