

# TCC Hotline

New Mexico Institute of Mining & Technology  
Tech Computer Center

November 29, 2006

## **Deinstallation of Speare Wireless**

The TCC wireless Ethernet currently running in the Speare building will be shut down on January 12, 2007. It is being replaced with the wireless system available campus-wide. Note that you must have a Banner ID to access the campus-wide wireless system. Alumni, NRAO employees, and others without a Banner ID should contact ISD to obtain wireless access where-ever it is available on campus for a monthly fee of \$21. Instructions for setting up your computer for the campus wireless can be found at:

<http://infoserve.nmt.edu/Wireless>

## **New Software for Spring Semester**

The following new software will be installed or updated for the spring 2007 semester. If you need any additional software to teach your classes, please inform us. Requests for new software that are received by December 15, 2006, will be installed at no charge. Requests received after December 15, 2006, will be billed to the requestor and there is no guarantee when it will be finished.

ArcGIS 9.2  
Keycreator 6  
Matlab R2006b

Xwin32 8  
XXE XML Editor  
Microsoft Internet Explorer 7

For a list of existing software, please check the web page:

<http://www.nmt.edu/tcc/packages.html>

## **Web-CT version 6 available**

Version 6 of Web-CT is now available for testing. It may be accessed at:

<http://webct6.nmt.edu>

The current version of Web-CT will still be available for the spring 2007 semester but it will be deinstalled on May 13, 2007. We encourage all faculty to convert their existing Web-CT classes to the new version 6. The TCC will conduct classes during the spring semester describing the changes.

## **Prototyping Room Moved to Speare 142**

The computers used to prototype new software that were previously located in Speare Hall room 9 have been moved to Speare Hall room 142.

## **New Color Printer**

A new Xerox Phaser 8500 color printer that can print duplex has been installed to replace the Xerox Phaser 860 color printer that died. The new printer is accessible via the queue COLOR.

## **SUN Sparcs Deinstalled**

The SUN Sparcs in Speare Hall room 14 have been deinstalled because of incompatibilities with our current version of Unix and the age of the equipment. Speare Hall room 14 has been converted for use of laptops with either wireless or wired Ethernet.
